- a) The Supplier shall provide such packing of the Goods as is required to prevent their damage or deterioration during transit to their final destination. The packing shall be sufficient to withstand, without limitation, rough handling during transit and exposure to extreme temperatures, salt and precipitation during transit and open storage.
- b) It is preferred to make bundles with top and bottom supporting boards by mechanical strapping.
- c) **Each bundle shall contain 50 books only for easy counting and handling.**

Method of quality Checking

Method of quality checking adopted is random sampling technique. The quality inspection staff conduct tests at the point of production to ensure that prescribed quality materials only are used and machines that are in good condition are adopted and the manpower engaged has the required technical skills. It is the responsibility of the supplier to provide the proof to establish this.

Approximately 5% of the books will be put for quality testing before they are despatched in the premises of the supplier. The supplier shall inform before they are packed and despatched.

The Books will be tested for the above parameters and method adopted is random sampling and physical testing only. Generally by visual and measuring methods. Only when warranted chemical testing will be conducted.

The total sample size shall be approximately 5%.

No of the books to be subjected for the quality checking will be recorded by the quality checking officers.

If the defects are found in more than 5% of the lot then it will be construed that the lot is defective beyond the tolerance limits and it will be rejected. Then it will be the responsibility of the Supplier to conduct testing of the complete lot and then replace the defective books and shall invite the purchaser for the quality inspection.
